

Installation notes — large-format slabs

Substrate flatness, adhesive selection, joint width and the setting-out sequence for a 3200 × 1600 format.

Substrate

Flatness	3 mm over 2 m straightedge
Moisture	Below 2 % CM for cementitious screeds
Movement joints	Carry through from the substrate, do not bridge

Adhesive and joints

Adhesive	C2TE S1 or better, full bed, back-buttered
Joint width	2 mm internal, 5 mm external
Coverage	100 % - no voids under a large format

Handling

Move slabs on edge with a frame. Two people and a suction rail for a full 3200 x 1600 slab; four for 20 mm.

Ardesa Surfaces - Cami Vell 118, 12540 Vila-real, Castellon, Spain
