

# Terra Ferro slab outlines

Nominal slab outlines and cutting allowances for setting out.

## Nominal slab

|                         |                           |
|-------------------------|---------------------------|
| Slab size               | 3200 × 1600 mm            |
| Thickness               | 12 / 20 mm                |
| Squared size after trim | deduct 20 mm on each edge |
| Minimum internal radius | 5 mm                      |
| Cut-out corner relief   | drill 6 mm before cutting |

## Setting out

Start from a fixed edge, not from the centre of the run. On veined and ribbed finishes the direction is set by the long dimension of the slab.
